

1. A storage pouch for storing and carrying reusable items and having means for determining which of the reusable items contained therein have been used or not used, the storage pouch comprising:

- a. a foldable panel made from a flexible sheet of material and having an interior surface and an exterior surface, the foldable panel forming three sections, where two of the three sections are foldable onto a stationary section;
- b. a plurality of pockets for respectively retaining the reusable items, each pocket attached to said interior surface and having a top opening for accessing said each pocket;
- c. a multiplicity of indicating flags wherein a respective indicating flag is respectively attached to said interior surface and located adjacent to said top opening of a respective one of said each pocket, where the indicating flag is movable to cover said top opening of said each pocket or tucked within said each pocket for respectively indicating which one of the reusable items contained therein have been used or not used; and
- d. a flap attached to an upper end of said foldable panel and having means for securing the flap to said foldable panel to secure said three sections together in its closed condition;
- e. whereby said pouch enables the reusable items to be stored therein by said plurality of pockets and in addition said indicating flag of said each pocket is either moved out of said each pocket to show that a reusable item has been used or tucked within said each pocket to show that the reusable item has not been used.

2. The storage pouch in accordance with Claim 1, wherein said securing means are loop and hook fasteners.

3. The storage pouch in accordance with Claim 1, wherein said indicating flag is red color.
4. The medium pouch in accordance with Claim 1, wherein said reusable item is a recording medium cartridge.
5. A storage pouch for storing and carrying reusable items and having means for determining which of the reusable items contained therein have been used or not used, the storage pouch comprising:
- a. a foldable panel having an interior surface and an exterior surface, the foldable panel forming at least three sections, where two of the three sections are foldable onto a stationary section;
 - b. a plurality of pockets for respectively retaining the reusable items, each pocket attached to said interior surface and having an opening for accessing said each pocket;
 - c. an indicating flag respectively attached to said interior surface and located adjacent to said opening of said each pocket, where the indicating flag is movable to cover said opening of said each pocket or tucked within said each pocket for respectively indicating which one of the reusable items contained therein have been used or not used; and
 - d. a flap attached to said foldable panel and having means for securing the flap to said foldable panel to secure said three sections together in a closed condition;
 - e. whereby said pouch enables the reusable items to be stored therein by said plurality of pockets and in addition said indicating flag of said each pocket is either moved out of said each pocket to show that a reusable item has been used or tucked within said each pocket to show that the reusable item has not been used.
6. The storage pouch in accordance with Claim 5, wherein said securing means are loop and hook fasteners.

7. The storage pouch in accordance with Claim 5, wherein said indicating flag is red color.
8. The storage pouch in accordance with Claim 5, wherein said foldable panel when folded is generally a rectangular shape.
9. The storage pouch in accordance with Claim 5, wherein said reusable item is a recording cartridge.
10. A container for storing and carrying reusable items and having means for determining which of the reusable items contained therein have been used or not used, the container comprising:
- a. a foldable panel having an interior surface and an exterior surface;
 - b. a plurality of pockets for respectively retaining the reusable items, each pocket attached to said interior surface and having an opening for accessing said each pocket; and
 - c. a multiplicity of indicating flags wherein a respective indicating flag is respectively attached to said interior surface and located adjacent to said opening of a respective one of said each pocket, where the indicating flag is movable to cover said opening of said each pocket or tucked within said each pocket for respectively indicating which one of the reusable items contained therein have been used or not used;
 - d. whereby said container enables the reusable items to be stored therein by said plurality of pockets and in addition said indicating flag of said each pocket is either moved out of said each pocket to show that a reusable item has been used or tucked within said each pocket to show that the reusable item has not been used.

11. The container in accordance with Claim 10, wherein said indicating flag is red color.
12. The container in accordance with Claim 10, wherein said foldable panel when folded is generally a rectangular shape.
13. The container in accordance with Claim 10, wherein said foldable panel is made from a flexible sheet of material.
14. The container in accordance with Claim 10, wherein said reusable item is a recording cartridge.
15. The container in accordance with Claim 15, wherein said securing means are loop and hook fasteners.
16. A container for storing and carrying reusable items and having means for determining which of the reusable items contained therein have been used or not used, the container comprising:
 - a. a panel having at least one surface;
 - b. a plurality of pockets for respectively retaining the reusable items, each pocket attached to said at least one surface and having an opening for accessing said each pocket; and
 - c. a multiplicity of indicating means wherein a respective indicating means is respectively attached to said at least one surface and located adjacent to said opening of a respective one of said each pocket, where the indicating means respectively indicate which one of the reusable items contained therein have been used or not used.

17. The container in accordance with Claim 16, wherein said foldable panel is made from a flexible sheet of material.
18. The container in accordance with Claim 16, wherein said panel forms at least three sections, where two of the three sections are foldable onto a stationary section.
19. The container in accordance with Claim 18, further comprising a flap attached to said panel and having means for securing the flap to said panel to secure said three sections together.
20. The container in accordance with Claim 19, wherein said securing means are loop and hook fasteners.
21. The container in accordance with Claim 16, wherein said indicating means includes an indicating flag.
22. The container in accordance with Claim 21, wherein said indicating flag is red color.
23. A container for storing and carrying at least one reusable item and having means for determining whether the at least one reusable item contained therein has been used or not used, the container comprising:
 - a. a panel having an interior surface and an exterior surface;
 - b. at least one pocket for retaining said reusable item, the at least one pocket attached to said interior surface and having an opening for accessing the at least one pocket; and
 - c. an indicating means attached to said interior surface and located adjacent to said opening of said at least one pocket, where the indicating means can be used to indicate whether the reusable item has been used or not used by having the

indicating means placed under the reusable item if the reusable item has not been used and by having the indicating means placed so that it lies over the reusable item if the reusable item has been used.

24. The container in accordance with Claim 23 wherein said container is permanently affixed to a carrying case.
25. The container in accordance with Claim 23 wherein said container is removably affixed to a carrying case.
26. The container in accordance with Claim 23 wherein said indicating means is a flag.
27. The container in accordance with Claim 26 wherein said indicating flag is a red color.
28. A container for storing and carrying at least one reusable item and having means for determining whether the at least one reusable item contained therein has been used or not used, the container comprising:
 - a. a panel having an interior surface and an exterior surface;
 - b. at least one pocket for retaining said reusable item, the at least one pocket attached to said exterior surface and having an opening for accessing the at least one pocket; and
 - c. an indicating means attached to said exterior surface and located adjacent to said opening of said at least one pocket, where the indicating means can be used to indicate whether the reusable item has been used or not used by having the indicating means placed under the reusable item if the reusable item has not been used and by having the indicating means placed so that it lies over the reusable item if the reusable item has been used.

29. The container in accordance with Claim 28 wherein said container is permanently affixed to a carrying case.
30. The container in accordance with Claim 28 wherein said container is removably affixed to a carrying case.
31. The container in accordance with Claim 28 wherein said indicating means is a flag.
32. The container in accordance with Claim 31 wherein said indicating flag is a red color.
